

Professional Experience

27 Months

Algo Analytics Pvt. Ltd.

Associate Data Scientist

June'22 –Sep '24

- Designed and developed innovative Large Language Model (LLM)-based demos to address diverse business use cases, driving scalable solutions for a leading Japanese multinational corporation.
- Presented functional prototypes to key stakeholders, empowering strategic decision-making and ensuring alignment with business objectives.
- Collaborated with product teams to enhance and develop LLM-based applications, ensuring seamless integration and meeting client-specific requirements for impactful business solutions.

Academic Record

PGDM – Big Data Analytics	2025 – 27	Goa Institute of Management, Goa	Pursuing
B.E (Computer Engineering)	2016 – 20	St. Vincent Pallotti College of Engineering & Technology	74.12%
HSC - Science	2015 – 16	Hislop College (Maharashtra State Board)	70.00%
SSC - General	2012 – 13	St. Peter's School (CBSE)	91.20%

Internships

9 Months

ExcelR Institute

Data Intern

Feb'21 –Oct'21

Sentiment Analyzer for Amazon Reviews	- A sentiment analysis project that involved scraping 20000 Amazon reviews for the book Think & Grow Rich to understand customer preferences & perceptions. - Conducted data scraping & preprocessing using lemmatization, tokenization, and stop word removal for improved data quality. Performed EDA and visualized sentiment associations using unigrams, bigrams, and trigrams to uncover customer insights. - Achieved 90% model precision, improving sentiment analysis accuracy for data-driven decisions on product positioning.
Chatbot for Seamless Data Science Interview Responses	- A chatbot designed to provide instant and accurate Data Science interview responses by matching user input with a structured QA dataset. - Collected and processed 15000 QA datasets using web scraping with BeautifulSoup and applied EDA, lemmatization, and tokenization for improved data clarity. Implemented TF-IDF vectorization with cosine similarity to ensure high-relevance responses, reducing response time by 50% and enhancing user satisfaction.

Academic Achievements & Certifications

- Certified in Data Science (ExcelR Institute) ,2021
- Certification in Text Analytics (IBM),2021
- Published Review paper: "Tracking System for Airport Traffic Control (ATC Nagpur) Vehicles," JES Publication ,2020

Live/ Academic Projects

Tracking System for Airport Traffic Control (ATC) Service Vehicles	- Developed a real-time Android-based tracking system using Firebase and Google Maps API to monitor ATC service vehicles without physical tracker hardware. - Enabled secure, 24/7 remote vehicle monitoring and improving operational visibility and efficiency.
---	---

Positions of Responsibilities

- Led a team of 3 interns to develop an inhouse ML application,2022

Core Competencies

Software Skills	Generative AI, RAG pipeline, Langchain Framework, Prompt engineering, Vector Database, Machine learning algorithms
Programming	SQL, Python
